

Multi-Point Locks

Product Bulletin

12229

SARGENT Manufacturing offers several variations of multi-point locks. In an effort to eliminate confusion as to what product to order for a specific application, here's a summary of the offering:

7000 Series

This product is a single or double point locking device, available with an option for electric latch retraction with momentary or continuous dogging of the latches. The 7000 Series can be used in a retrofit application or new installation that does not require specialized certification/compliance.

7300 Series

This four-point deadlocking device can be used in a retrofit application or new installation that does not require specialized certification/compliance.

BL7300 Series

Designed for blast and/or hurricane certification compliance, this product must be fully integrated with Ceco and Curries Multi-Solution Opening doors and frames and McKinney StormPro® hinges in order to meet UFC 4-010-01 (2020) and ASTM 2927-12 (2012) certification.

FM7300 Series

A four-point deadlocking system, designed to help secure community shelters and/or safe rooms under the most hazardous tornado conditions, this product must be fully Integrated with Ceco Door StormPro® 361 or Curries StormPro® 361 doors and frames and McKinney StormPro® hinges in order to meet ICC500 (2014), FEMA P-361 (2015), and FEMA P-320 (2014) certification.

FM6100 Series

A three-point system, ideal for shutters to secure shelter window openings, this product must be fully Integrated with Ceco Door StormPro® 361 or Curries StormPro® 361 shutters and frames and McKinney StormPro® hinges in order to meet ICC500 (2014), FEMA P-361 (2015), and FEMA P-320 (2014) certification.
